Tue, 31 Jan 2012 structure, properties, behavior and types of bonding in and between 23:56:00 GMT Chemistry the changes they undergo during atoms/compounds will be tutorials - Electronegativity,

symbol χ , is a chemical property that describes the tendency of an atom to attract a shared pair of electrons (or electron density) towards itself. An atom's electronegativity is affected by both its atomic number and the distance at which its valence electrons reside from the charged nucleus. Electronegativity - Wikipedia - US Army Medical Course MD0803-100 - General Chemistry - Free download as PDF File (.pdf), Text File (.txt) or read online for free.
