Introduction. NO State Education  
Department in Australia has made  
dissection compulsory. It is left to  
the discretion of the teacher  
within the guidelines for the  
syllabus, yet virtually all science  
teachers still include dissection in  
biology classes. Thu, 17 May

Vertebral artery dissection (VAD)  
is a flap-like tear of the inner  
lining of the vertebral artery,  
which is located in the neck and  
supplies blood to the brain. After  
the tear, blood enters the arterial  
wall and forms a blood clot,  
thickening the artery wall and  
often impeding blood flow. Wed,
